OBJECTIVE A wide-ranging position building impactful systems in Elixir, preferably while using agile development methods.

SKILLS Elixir, Ruby, C++, JavaScript, HTML, CSS, Terraform, Kafka, RabbitMQ, Phoenix, Rails, React, Postgres, MySQL, Kanban, Scrum, Git/GitHub, Test Driven Development (TDD), Pair Programming

CHRONOLOGY

- Elixir / LiveView (2017 onward) the web is fun again!
- Ruby / Rails (2005-2020) a beautiful language and amazing web framework.
- C / C++ (pre-2009) implemented bit-level algorithms on bare-metal data.

TheScore

December 2022 - February 2024

Senior Software Engineer

Elixir, Phoenix

- Enhanced and supported the complex registration flow for online sports gambling, which included multiple 3rd-party integrations with KYC (Know Your Customer) vendors and state-specific requirements.
- Rebranded to ESPNbet and supported our site for the 2024 Superbowl

Community

May 2021 – June 2022

Senior Software Engineer

Elixir, Phoenix, RabbitMQ

- Wrote event-based microservices in elixir, often while pairing, to add features.
- Teamed with Twilio and telecoms for FCC-mandated TCR anti-spam system.
- Used Pivotal Tracker, agile practices, and a rigorous design process to build a resilient system atop AWS services.

DealPath

October 2020 – April 2021

Senior Software Engineer

Ruby, Sinatra, React

- Converted Angular components to React components, while improving them.

HotelTonight / Airbnb

August 2018 – July 2020

Senior Software Engineer

Ruby, Rails, Terraform, AWS, Kafka

- Reduced fraud by adding 2FA and Sift fraud detection.
- Corrected hotel tax rates by integrating with Avalara tax software.
- Improved the AWS site infrastructure using Terraform: ELBs to ALBs, Fastly and Route53 improvements, and S3 security lockdowns.

LeTote November 2017 – May 2018

Senior Software Engineer

Elixir, Ruby, Rails, AWS, Redis

- Extracted hard-coded US-specific integrations into adapters for replacement with China-specific integrations by our Chinese joint venture.
- Extended Fulfillment-Center Elixir code to handle Chinese use cases.

Fond / AnyPerk December 2014 – September 2017

Senior Software Engineer

Ruby, Rails, MySQL, Redis, Redshift

- Designed and implemented personalized emails and home pages for our users.
- Built a data warehouse for our Data team.

Razoo November 2012 – November 2014

Senior Software Engineer

Ruby, Rails, MySQL, AWS, Redis, Kanban

- Raised funds for 501(c)(3) nonprofits by extending and supporting razoo.com using Kanban, code reviews, and pair programming.
- Optimized the import of IRS data by 85% over the previous implementation.

RPX April 2011 – November 2012

Senior Software Engineer

Ruby, Rails, PostgreSQL, JQuery, Redis

- Imported patent and litigation data to the RPX site from third-party providers, using Pair Programming and TDD while following Pivotal Labs' agile development process.

Aspera Jan 2010 - Oct 2010

Senior Software Engineer

Ruby, Rails, MySQL

- Expanded the feature set of the Aspera Console application, adding multiple reporting formats and report scheduling.

WildPackets Feb 2008 - Jan 2010

Senior Software Engineer

Ruby, Rails, PostgreSQL

- Lead the Rails development of the WatchPoint network analysis tool.

EDUCATION Bachelors in Computer Science, University of California at San Diego
