OBJECTIVE A wide-ranging position building cutting-edge systems in Elixir or Ruby using agile development methods.

SUMMARY Software engineer with broad experience and excellent teamwork skills. Experienced with multiple software platforms, languages, and tools. Committed to creating robust, scalable software that is maintainable for the long term. Successful in handling difficult problems with persistence, creativity, and thorough analysis.

SKILLS Elixir, Ruby, JavaScript, HTML, CSS, shell tools, Perl, LISP, C++ Rails, Phoenix, React, JQuery, Postgres, MySQL Git/GitHub, Test Driven Development (TDD), Pair Programming

DealPath

October 2020 – Present

Senior Software Engineer Ruby, Sinatra, React

- Converted Angular components to React components, while improving them.
- Optimizing activity feed performance with SQL, Ruby, and JavaScript.

HotelTonight / Airbnb

August 2018 – July 2020

Senior Software Engineer Ruby, Rails, Terraform, AWS

- Reduced fraudulent activity for HotelTonight by adding 2FA and Sift fraud detection.
- Corrected hotel tax rates by integrating with Avalara tax software.
- Improved the AWS site infrastructure using Terraform: ELBs to ALBs, Fastly and Route53 improvements, and S3 security lockdowns.

LeTote

November 2017 – May 2018

Senior Software Engineer Elixir, Ruby, Rails, AWS, Redis

- Extracted hard-coded US-specific integrations into adapters for replacement with CN-specific integrations by our Chinese joint venture.
- Extended Fulfillment-Center Elixir code to handle Chinese use cases.

Fond / AnyPerk Senior Software Engineer Ruby, Rails, MySQL, Redis, Redshift December 2014 – September 2017

- Designed and implemented personalized emails and home pages for our users.
- Built a data warehouse for our Data team.

john.baylor@gmail.com

510-418-8150

Razoo

November 2012 – November 2014

Senior Software Engineer Ruby, Rails, MySQL, AWS, Redis, Kanban

- Raised funds for 501c3 non-profits by extending and supporting razoo.com using Kanban, code reviews, and pair programming.
- Optimized the import of IRS 501(c)(3) data by 85% over the previous implementation.

RPX

April 2011 – November 2012

Senior Software Engineer Ruby, Rails, PostgreSQL, JQuery, Redis

• Imported patent and litigation data to the RPX site from third-party providers, using Pair Programming and TDD following Pivotal Labs' agile development process.

Catalog Choice

Jan 2011 - Mar 2011

Senior Software Engineer Ruby, Rails, MySQL

• Implemented community management and basic reporting for CatalogChoice.org.

Aspera

Jan 2010 - Oct 2010

Senior Software Engineer Ruby, Rails, MySQL

• Expanded the feature set of the Aspera Console application, adding multiple reporting formats and report scheduling.

WildPackets

Feb 2008 - Jan 2010

Senior Software Engineer Ruby, Rails, PostgreSQL

Lead the Rails development of the WatchPoint network analysis tool.

PayByTouch / Indivos Senior Software Engineer / Manager C++, C, Ruby, Rails Jan 2001 - Oct 2007

- Managed the C++ client-side team for the Pay By Touch biometric system.
- Introduced Ruby, and Rails, to the tech stack, for automated code generation, and for exposing monitoring data for production support.

EDUCATION Bachelors in Computer Science, University of California at San Diego **INTERESTS** Swimming, blindfold chess, <u>Go</u>, juggling, exploring technology.

PROJECTS Pixels, Twitter-Bot, Poker Calculators, and many learning experiments.
